

13th June 2024

Name	Institute	Type	Length (min)	Title/Subject	Start
Coffee and		Coffee and	20	Coffee and reception	10:00
		Introduction	10		10:20
Daniele Dini	Imperial College London	Invited	30	TBC	10:30
Ikuya Kinefuchi	The University of Tokyo	Contributed	20	Non-Markovian dissipative particle dynamics	11:00
Patrick Sullivan	Durham University	Contributed	20	Nanoscale Surface Effects on Vapour Bubble Nucleation	11:20
		Discussion	30		11:40
Lunch		Lunch	60	Lunch	12:10
Billy Todd	Swinburne University	Invited	30	TBC	13:10
Dmitry Nerukh	Aston University	Contributed	20	Hybridising molecular dynamics with hydrodynamics	13:40
Sritay Mistry	Brunel University	Contributed	20	Hydrogen nanobubbles in ammonia	14:00
		Discussion	30		14:20
Break		Break	20	Break	14:50
Yasutaka Yamaguchi	Osaka University	Invited	30	Mechanical and Thermodynamic Features of Liquid-Related Interfaces and Wetting by Molecular Dynamics	15:10
Samy Merabia	CNRS and Université Lyon 1	Contributed	20	Thermal transport at solid-liquid interfaces: colloidal metallic nanoparticles and nanostructured gold-water interfaces coated with graphene	15:40
Muhammad Rizwanur Rahman	Imperial College London	Contributed	20	Thin Films: Formation, Frustration and Fragmentation	16:00
		Discussion	30		16:20
Break		Break	20	Break	16:50
Marcello Sega	Univesity College London	Invited	30	TBC	17:10
Takuya Kuwahara	Osaka Metropolitan	Contributed	20	In situ synthesis of superlubric interfaces via mechanochemistry: learning molecular mechanisms from computer simulations	17:40
Gota Kikugawa	Tohoku University	Contributed	20	Molecular-scale picture on heat transfer characteristics of organic interfaces and polymeric materials	18:00
		Posters	60		18:20
		Dinner	120		19:20
Finish					21:20

14th June 2024

Name		Type	Length (min)	Title/Subject	Start
Peter Daivis	RMIT	Invited	30	TBC	09:00
Laurent Joly	Institut Lumière Matière / Université Lyon 1	Contributed	20	Molecular views on thermo-osmotic transport	09:30
Takeshi Omori	Osaka Metropolitan	Contributed	20	Measuring dynamic contact angles by computational fluid dynamics and molecular dynamics	09:50
		Discussion	30		10:10
Break		Break	20	Break	10:40
Kazumichi Kobayashi	Hokkaido University	Invited	30	Molecular fluid dynamics approach to boundary conditions at vapor-liquid interfaces for the Boltzmann equation	11:00
Davide Sarpa	University of Southampton	Contributed	20	Exploring Lubricant Chemistry: From Molecular Dynamics to Linear- scaling DFT	11:30
Antonio Buffo	Politecnico di Torino, Italy	Contributed	20	Coupling Dissipative Particle Dynamics and Computational Fluid Dynamics for an industrial mixing process	11:50
		Discussion	30		12:10
Lunch		Lunch	60	Lunch	12:40
Shin-ichi Tsuda	Kyushu University	Invited	30	A Multi-scale study on hydrogen cavitating flow	13:40
Donatas Surblys	Tohoku University	Contributed	20	Heat Transfer at Solid-Liquid Interfaces and beyond via Molecular Dynamics: Various Insights	14:10
Hiroki Kusudo	Tohoku University	Contributed	20	Heat transport phenomenon during dynamic wetting: insight from molecular dynamics	14:30
		Discussion	30		14:50
Break		Break	20	Break	15:20
Zhaoran Zhu	Imperial College London	Contributed	20	Effect of Electric Fields on the Decomposition of Nanoconfined Phosphate Esters	15:40
Carlos Corral-Casas	Imperial College London	Contributed	20	Velocity Slip in Fluids under Molecular Confinement	16:00
		Contributed	20		16:20
Finish					16:40
